

ZMIANY w MeSH w 2021

Changed and Deleted MeSH Headings—2021

Changes to MeSH Headings

For 2021, fourteen MeSH headings were either changed or deleted and replaced with more up-to-date terminology.

Replaced Term

Alaska Natives

Aldehyde Dehydrogenase 1

Bonding, Human-Pet

Clostridium difficile

Debaromyces

Infantile Apparent Life-Threatening Event

Mentally Disabled Persons

Pectobacterium chrysanthemi

Replaced-By Term

[Alaskan Natives](#)

[Aldehyde Dehydrogenase 1 Family](#)

[Human-Animal Bond](#)

[Clostridioides difficile](#)

[Debaryomyces](#)

[Brief, Resolved, Unexplained Event](#)

[Persons with Mental Disabilities](#)

[Dickeya chrysanthemi](#)

Pimenta

Pyruvate Dehydrogenase (Acetyl-Transferring) Kinase

Respiratory Distress Syndrome, Adult

RNA Replicase

Site-Specific DNA-Methyltransferase (Cytosine-N(4)-Specific)

Social Distance

[Genus Pimenta](#)

[Pyruvate Dehydrogenase Acetyl-Transferring Kinase](#)

[Respiratory Distress Syndrome](#)

[RNA-Dependent RNA Polymerase](#)

[Site-Specific DNA-Methyltransferase \(Cytosine-N4-Specific\)](#)

[Psychological Distance](#)

Entry Combination Revisions - 2021

There were two new Entry Combinations for 2021.

**Previous MeSH Heading/Subheading
(Entry Combination)**

Immune Checkpoint Proteins/antagonists & inhibitors

Viral Proteases/antagonists & inhibitors

Replaced-by Heading for 2021

[Immune Checkpoint Inhibitors](#)

[Viral Protease Inhibitors](#)
